ABOUT ME

Information Systems student (GPA 3.95/4.00) with hands-on experience building backend systems, REST APIs, and full-stack web applications. Proficient in Golang and TypeScript, with practical exposure to PostgreSQL, MySQL, Git-based workflows, and cloud deployment on Azure. I thrive in fast-paced, startup-like environments and believe in writing clean, maintainable code that solves real problems. I actively seek feedback, embrace new technologies quickly, and enjoy collaborating across technical teams to ship meaningful products.

EDUCATION

Universitas Jember - Jember, Indonesia Aug 2023 – Aug 2027 (Expected)

Bachelor of Information Systems · Semester 6 · GPA: **3.95 / 4.00**

- Active Laboratory Teaching Assistant & Coordinator - guided 50+ students per semester
- Relevant coursework: Data Structures & Algorithms, OOP, Web Programming, Mobile Dev, Design Patterns

WORK EXPERIENCE

Software Engineer Intern Aug 2025 – Dec 2025

PT Suitmedia Kreasi Indonesia

- Developed client-facing KMS web applications based on detailed business requirements
- Built and integrated REST APIs; implemented admin dashboards with role-based access control
- Participated in cross-functional collaboration with Analyst, Design, and Frontend teams
- Conducted code reviews and followed Agile sprint workflows throughout the product cycle

ORGANIZATIONAL EXPERIENCE

Coordinator of Laboratory Teaching Assistants Jul 2025 – Present

Software Engineering Laboratory, Universitas Jember

- Lead and coordinate 10+ teaching assistants, ensuring lab sessions run efficiently each semester
- Act as primary liaison between assistants, lecturers, lab head, and faculty administration

Laboratory Teaching Assistant Aug 2024 – Present

Software Engineering Laboratory, Universitas Jember

- Guided 50+ students per semester in Algorithm & Programming, OOP, and Web Programming
- Supported debugging, code review, and concept explanation in practical lab sessions

TECHNICAL SKILLS

Languages	Golang · TypeScript · JavaScript · PHP · Python · C#
Backend	REST API Development · Laravel · FastAPI · Golang HTTP · JSON & HTTP
Frontend	React.js · Next.js · Vue.js · Tailwind CSS · Laravel Blade/Livewire
Database	PostgreSQL · MySQL · Supabase · MongoDB (familiar)
DevOps/Cloud	Git · GitHub · GitHub Actions (CI/CD) · Azure · Vercel · Railway · Nginx
AI / ML	TensorFlow · LSTM · Isolation Forest · SHAP (XAI) · Roboflow
Soft Skills	Problem Solving · Communication · Teamwork · Fast Learner · Code Review

SELECTED PROJECTS

Project	Stack	Key Contribution
---------	-------	------------------

TrustChain AI	Golang · FastAPI · TensorFlow · Azure · React	Built ML anomaly detection API (LSTM+IsolationForest), deployed on Azure with SHAP explainability
SINARASA	Laravel Livewire · MySQL · Azure · CI/CD	Full-stack waste bank system; GitHub Actions pipeline for auto-deploy to Azure Ubuntu VM
SkillSwap	Laravel · MySQL · REST API · Railway	Architected backend & 4 API integrations (Jitsi, Midtrans, Cloudinary, Botpress) – Hackathon Top 4
HistoPlay	Next.js · TypeScript · Supabase · Vercel	Engineered recursive DB schema for branching narratives + real-time scoring engine
Anggrek AI	Laravel · Roboflow API · PostgreSQL	Integrated external AI vision API into inventory system; role-based access control

AWARDS & CERTIFICATIONS

- 1st Place - Innovius Web Design Competition (2025)
- 3rd Place - I-COM Competitive Programming (2024)
- Finalist Top 4 - Technoday Hackathon (2025)
- BNSP - Junior Mobile Developer (2024)
- HackerRank - Python Basic (2025)
